**DETAILED ACTION**

***Response to Amendment***

The amendments to the claims have been entered because they put the claims in better condition for appeal.

The indication of allowable subject matter of claims 1, 4-5, and 7-20 is withdrawn in light of the following rejection.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4-5 and 7-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice.

***Claim Rejections - 35 USC § 101 and 112***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims **1, 4-5, 7-20** are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an

improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claims **1, 4-5, and 7-20** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

**Claim 1** provides for controlling a plurality of manipulators, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process the applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

**Claims 4-5, and 7-20** further delimit the method/process of claim without reciting any steps involved in the further method/process. It is unclear what the extended method/process the applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

### ***Interview Summary***

Applicant's representative, Theobald Dengler, was in discussion with the Examiner on August 29, 2008 about rewriting claim 1 to overcome the above rejection, but a satisfactory solution was not reached in sufficient time to avert this rejection.

***Allowable Subject Matter***

**Claims 21, 24 – 31 and 33 - 44** are allowed.

The Examiners statement of reasons for allowable subject matter is contained in a previous office action.
